

Keybindings

These are the default key bindings. You can remap these by clicking on the map keys from the popup menu.

Key Stroke	Description
F1	PF1
F2	PF2
F3	PF3
F4	PF4
F5	PF5
F6	PF6
F7	PF7
F8	PF8
F9	PF9
F10	PF10
F11	PF11
F12	PF12
Shift + F1	PF13
Shift + F2	PF14
Shift + F3	PF15
Shift + F4	PF16
Shift + F5	PF17
Shift + F6	PF18
Shift + F7	PF19
Shift + F8	PF20

Keybindings

Shift + F9	PF21
Shift + F10	PF22
Shift + F11	PF23
Shift + F12	PF24
Enter	Field Exit

Insert	Toggle insert mode (cursor changes shape to

Keybindings

	half height cursor) Right shift of field characters in insert mode
Delete	Delete character (with left shift of field characters)
BackSpace	Delete Previous Character (with left shift of field characters)
Keypad plus	Field Positive Key (works like field exit in non numeric fields)
Keypad minus	Field Minus Key
Tab	Next Field
Shift + Tab	Prev Field
Home	Home position
End	End of field
Alt + PageUp	Next Session
Alt + PageDn	Previous Session
Alt + O	Debug output mode (see not below)

Table 1: Key Bindings

Note:

Alt + O (not zero) by itself will turn on debugging mode that I use for testing and will probably slow down the session painting because it outputs all input data streams to log.txt and to the screen. I will take this out as soon as I can. If you have any other suggestions or key combinations for this let me know!!!!!! Oh by the way this toggles the mode so if it is on then hitting it one more time will turn it off.
